

Medium Diamonds Installation Guide

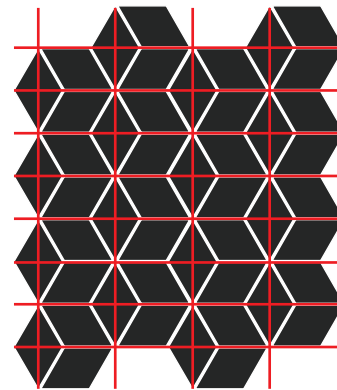

1 VISUALIZE YOUR LINES

If you are installing your sheets in **cube pattern**, visualize the horizontal diamonds as your horizontal lines to keep your sheets straight. Use the vertical grout spaces to ensure that your lines are perpendicular with your horizontal lines. For **star pattern**, the reverse is true. Visualize the vertical diamonds as your vertical lines and the horizontal grout spaces as your horizontal lines.

CUBE PATTERN

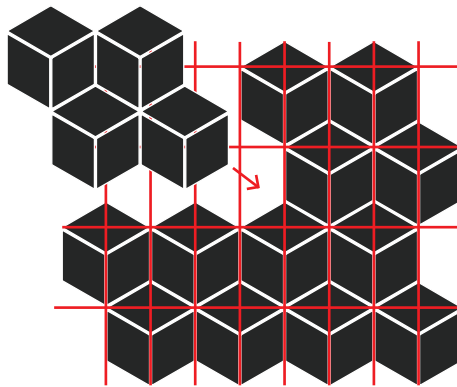

STAR PATTERN

2 DRY LAYOUT

Start with doing a **dry layout**. Visualize this grid as you place the tiles next to each other.

★ TIPS

- Keep an eye on the variation of your sheets when doing a dry layout. Adjust sheets as needed.
- As you move further along, use a tape measure to keep an eye on where the tiles are landing, adjusting as needed so the grid is consistent.
- Use a level to keep your rows perfectly even.
