

Mid Mod Squares Installation Guide

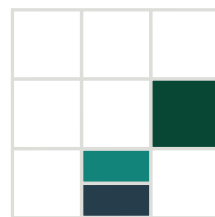

There are significant differences between installing handmade tile and machine-made tile. Here are some general guidelines to help you on your way. They take more time upfront but will save you time in the end. Because our tile is made by hand from start to finish, you can expect to see color, size, and grout joint variation in your installation. This characteristic is part of what makes handmade tile so uniquely stunning. We recommend working with a tile installer who has experience installing handmade tile to ensure a beautiful outcome. Please feel free to reach out to us if you need assistance finding an installer.

DRY LAYOUT

Customize your space by laying out the sheets randomly in a dry layout, and adjusting where you see fit before installing. Turn the sheets 90 degrees for more design options!

★ TIPS

- Keep an eye on the variation of your sheets when doing a dry layout. Adjust sheets as needed.
- As you move further along, use a tape measure to keep an eye on where the tiles are landing, adjusting as needed so the grid is consistent.
- Use a level to keep your rows perfectly even.
