

Moroccan Fish Scales Installation Guide

1 VISUALIZE YOUR LINES

Think of fish scales as a grid, with the tips being the vertical lines and the side edges being your horizontal lines. Whether you are installing with the points up or down, the same is true for the vertical and horizontal lines.

TIPS UP

TIPS DOWN

2 DRY LAYOUT

Start with doing a **dry layout**. Visualize this grid as you place the tiles next to each other.

★ TIPS

- Keep an eye on the variation of your sheets when doing a dry layout. Adjust sheets as needed.
- As you move further along, use a tape measure to keep an eye on where the tiles are landing, adjusting as needed so the grid is consistent.
- Use a level to keep your rows perfectly even.
